

WARKOP OS - LOW BUDGET / FULL FREE STARTER PLAN

Target: 1 Warkop, Modal Minimum, Siap Scale-Up

Visi

Digitalisasi warkop tanpa biaya besar. Fokus QR Menu, POS Kasir, Kitchen Display, Dashboard Owner, dan QRIS. Semua dibangun dengan software gratis/open-source.

Tech Stack Gratis

Frontend: React + Vite + Tailwind + Shadcn UI. Backend: NestJS. Database: PostgreSQL.
Realtime: Socket.IO. Storage: MinIO. Maps: OpenStreetMap. Mobile Future: Flutter. Deployment:
Docker di Ubuntu VPS atau server lokal.

Role Sistem

Owner, Kasir, Dapur, Pelayan, Customer.

Flow Customer

Scan QR meja -> Pilih menu -> Checkout -> QRIS/Bayar Kasir -> Dapur menerima order -> Masak
-> Siap -> Pelayan antar -> Selesai.

Flow Kasir

Input pesanan -> Terima pembayaran -> Cetak struk -> Kirim ke dapur.

Flow Dapur

Order Baru -> Cooking -> Ready -> Pelayan Ambil.

Dashboard Owner

Omset hari ini, jumlah order, menu terlaris, jam ramai, transaksi kasir.

Database Awal

users, tables, categories, menus, orders, order_items, payments, kitchen_tickets, shifts, notifications, audit_logs.

API Awal

Auth API, Menu API, Order API, Payment API, Kitchen API, Dashboard API.

Roadmap

Phase 1: QR Menu + POS + Kitchen Display. Phase 2: Dashboard Analitik. Phase 3: Delivery Internal. Phase 4: Multi Cabang.
